

statemachine_address
_received

```
graph LR; A[statemachine_address_received] --> B[is_valid_control_byte]
```

A diagram showing a dependency. On the left, a gray rectangular box contains the text "statemachine_address_received". A blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text "is_valid_control_byte".

is_valid_control_byte
